Technical Skills

- **Programming Languages:** Advance/Core Java, JavaScript
- **Frameworks & Libraries:** SpringBoot, React.js, Spring Framework
- **Tools & Platforms:** Git/Github, Hibernate(JPA), Maven
- **Other Skills:** Database Management (MySQL,PostgreSQL), JWT Authentication

Professional Experience

Kindred Elements Pvt. Ltd.

Jan - March 2025

Software Developer Intern

- Designed and developed **responsive web interfaces** using **JavaScript, and Tailwind**, ensuring cross-browser compatibility and mobile-first performance.
- Designed and implemented production REST APIs using Spring Boot, reducing frontend **dependency delays**.
- Assisted in **debugging, testing, and performance optimization** of backend functionalities using Postman with Nodejs and Springboot.

Google Developers Groups on Campus

May 2025 - Present

Project Manager & volunteer

- Led the **development and maintenance of the GDGC website** using **React and Tailwind CSS**, delivering a modern, responsive, and scalable frontend architecture.
- Designed and implemented **reusable UI components** and optimized layouts to ensure consistency, performance, and mobile responsiveness.
- Oversaw the end-to-end website workflow, including **feature planning, code reviews, and deployment oversight**, ensuring timely and high-quality delivery.

Personal Projects

Pawfect: AI-powered veterinary assistant

Technologies: Java 21, Spring Boot 3, PostgreSQL, Hibernate, JWT, Groq API, Next.js 14

- Developed a **Spring Boot 3 (Java 21) REST API** using layered architecture (Controller–Service–Repository).
- Implemented **JWT-based stateless authentication** with Spring Security and BCrypt.
- Designed **PostgreSQL persistence layer** using JPA/Hibernate with clean entity modeling.
- Integrated external AI services via **Java HttpClient** (OpenAI-compatible Groq API) with streaming responses.

RideMate: Real-Time car pooling website

Technologies: Maven, Java Spring Boot, JWT, WebSocket, Hibernate, PostgreSQL, React

- Engineered a scalable backend for a ride-sharing platform using **Spring Boot and REST APIs**, enabling ride creation, search, booking, and cancellation workflows.
- Secured APIs with **JWT authentication and role-based access control (RBAC)** via Spring Security, ensuring protected driver and passenger operations.
- Implemented **real-time driver location tracking and event-based notifications** using WebSockets to enable live ride monitoring.

Education

Dr. Akhilesh Das Gupta Institute Of Professional Studies

B.Tech, Information Technology

Relevant Coursework: OOPS, DBMS, OS, Networking, Data Structures

Delhi, IN

July 2026

CGPA 8.00
